- No mechanical modifications required
- Compatible Programming
- Re-use existing programs

Fagor 8000, 8010, 8020, 8025, Mark Century One and Mark Century One Plus units are now obsolete. Any Repair of these controllers are very expensive (if at all possible) due to obsolete components. Fagor have produced the 8035 as a solution. Upgrading to a new 8035 means you shall have a new fully warrantied cnc controller on your machine.

1

Note: Above does not include replacement of units with an integrated or external PLC. Please ensure you obtain a fixed price prior to order. Price dependant on machine location.
