

Eliminate the error, cut your machine / operator set-up times

PROBE it !! PROBE it !! PROBE it !! PROBE it !!

Full probe systems to suit your Heidenhain control, optional probe training, if requested.

Tool Probing with Heidenhain TT range of probes

Are you a Heidenhain TNC user ?

Would you like to cut to size every time ?

PROBES for HEIDENHAIN controls :

TT 140 Table top tool probe for TNC Controls :-

TNC 320

TNC 370

TNC 400 and i530

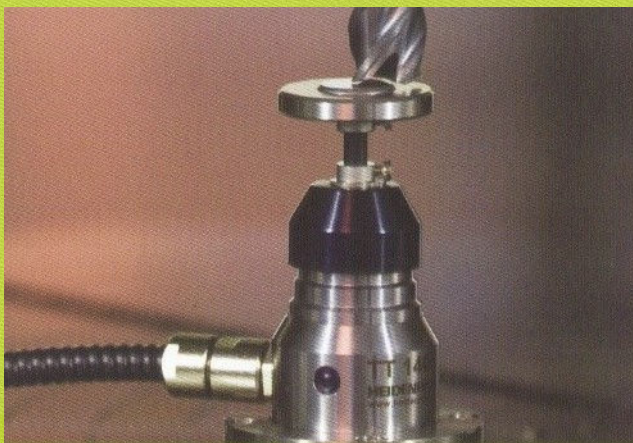

Probing cycles are a standard feature on HEIDENHAIN TNC controls

It Happens !

Should an accidental collision occur, the central spindle of the probe has been designed with this in mind and can be easily replaced.

Supplied with 1-off as spare

The TT 140 tool measurement touch probe offers the following benefits :

- Automatic in cycle measurement of actual tool length and tool radius
- Measurement of tool while in spindle
- Transfer of length and radius to the central tool file
- Monitoring of tool wear and tool breakage tolerances
- Facilitates unattended machine operation
